

ATLAS FT3X-24 MAGNETIC SWEEPER

Atlas FT3X-24 Magnetic Road Sweeper

- ★ **Lifetime Guarantee** on magnetism
- ★ Designed for commercial airports and military fields
- ★ Produces more magnetic power than other models
- ★ Easily sweep confined and congested areas
- ★ World's largest magnetic sweeper!

- Removes potentially damaging metal debris from large constrained or congested areas.
- Can achieve sweeping clearances from 8 ft. - 24 ft. (smaller section widths are available) and traveling speeds of up to 55 mph.
- Manufactured with Grade VIII Ceramic magnet material - the highest grade available.
- The permanent, non-electric magnets are inside a welded, heavy-gauge steel housing with stainless steel bottom.
- Produce more magnetism over a larger area through greater distances.
- Optional remote battery-operated switch available for automatic release.
- Provide most effective and labor-saving FOD control at airports.
- Dings offers various models and sizes of Magnetic Sweepers to fit your specific requirements.

LIFETIME WARRANTY ON MAGNETISM

Dings Magnetic Sweepers are designed with permanent magnets. This means magnetism is guaranteed permanent and covered by a lifetime warranty.

WORLD'S LARGEST SWEEPER

Dings Atlas FT3X-24 Magnetic Road Sweeper clears a 24 ft. path in a single pass. It consists of three trailer units (identical in construction), which can be hitched together or hooked up in-line. The FT3X-24 model allows just one crew member to clear long runways in significantly less time than conventional models. The FT3X-24 models are constructed with heavy-duty, high-speed trailer running gear, retractable extensions arms with two pintle hook hitches, a pintle hook hitch in the center of the back frame, a forged steel ring hitch and swing-away swivel jack. The sections can be used interchangeably, allowing any of them to be connected to the vehicle as lead magnet. The quick hookup for sweeping or inline towing makes the Atlas FT3X-24 easy to use.
