

Atlas FT3X-24 Magnetic Sweeper: Worlds Largest Magnetic Sweeper

- ◇ Designed for commercial airports and military fields
- ◇ Reduces tire repairs and replacement costs
- ◇ Ceramic Grade VIII magnetic material
- ◇ Durable carbon steel and stainless steel construction
- ◇ Effective, economical and convenient protection
- ◇ Maintenance-free, easy-to-use models
- ◇ Easily sweep confined and congested areas

Atlas RT3X-24 Road Sweeper in sweep position

Dings' Magnetic Sweepers protect tires from damage caused by steel objects like nails, screws, wire, rods and other damaging scrap metal. A Magnetic Sweeper operates by simply moving it over areas that need cleaning. It automatically picks up loose pieces of steel. Dings Magnetic Sweepers cost nothing to operate, because they are built with permanent magnets that don't consume energy. The magnetism is guaranteed for life! They are easy-to-use, highly effective and built to operate year after year with an exceptional degree of reliability.

Dings Atlas FT3X-24 Magnetic Sweeper

Dings Atlas FT3X-24 Magnetic Road Sweeper clears a 24 ft. path in a single pass. It consists of three trailer units (identical in construction), which can be hitched together or hooked up in-line. The FT3X-24 model allows just one crew member to clear long runways in significantly less time than conventional models. The FT3X-24 models are constructed with heavy-duty, high-speed trailer running gear, retractable extensions arms with two pintle hook hitches, a pintle hook hitch in the center of the back frame, a forged steel ring hitch and swing-away swivel jack. The sections can be used interchangeably, allowing any of them to be connected to the vehicle as lead magnet. The quick hookup for sweeping or inline towing makes the Atlas FT3X-24 easy to use.

Dings' Atlas FT3X-24 Magnetic Sweeper Features

- ◇ Effective on rough terrain; such as: unpaved ground containing rocks, bumps, pot holes and other obstructions under bad weather conditions.
- ◇ Can achieve sweeping clearances from 8 ft. - 24 ft. (smaller section widths are available) and traveling speeds of up to 55 mph.
- ◇ Optional remote battery-operated switch available for automatic
- ◇ Provide most effective and labor-saving FOD control at airports.

Dings uses Superior Grade Ceramic VIII in Their Magnetic Sweepers

Ceramic VIII is best grade of ceramics for magnets, ensuring a stronger, longer lasting magnetic field. Ceramic VIII has a better resistance to demagnetization than Ceramic V or other lower grade materials.

Engineering Driven - Customer Service Focused

Dings Company Magnetic Group engineering and sales staff work together from our Milwaukee, WI factory to provide outstanding customer service from experts in magnetic separation. First, we listen to our customers to gain an understanding of their needs. Then we apply our experience in their trade to provide magnetic separation equipment that is sized and positioned for the best possible performance in their specific application.
